hypothetical protein YKL010c - yeast (Saccharomyces cerevisiae)
N;Alternate names: hypothetical protein YKL162
C;Species: Saccharomyces cerevisiae
C;Date: 07-May-1993 #sequence_revision 07-May-1993 #text_change 09-Jul-2004
C;Accession: S30015; S37821
R;Pascolo, S; Ghazvini, M.; Boyer, J.; Colleaux, L.; Thierry, A.; Dujon, B.
Reast, 8, 987-995, 1992
A;Title: The sequence of a 9.3 kb segment located on the left arm of the yeast chromosome
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                         A;Molecule type: DNA

Geruma albumin 1 precursor - Atlantic salmon
C;Species: Salmo salar (Atlantic salmon)
C;Species: Salmo salar (Atlantic salmon)
C;Date: 31-Dec-1993 #sequence_revision 31-Dec-1993 #text_change 09-Jul-2004
C;Accession: A36238; S13079
DNA Cell Biol. 9, 647-655, 1990
A;Title: Atlantic salmon (Salmo salar) serum albumin: cDNA sequence, evolution, and tissualization and tissualization and the sequence of the sequence 
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                               A/Cross-references: UNIPROT: P21848; UNIPARC: UP100001257B6; GB: X52397; NID: g64375; PIDN: Cf. Comment: Serum albumin is synthesized in the liver as preproalbumin. It binds copper, ranse (weak bonds with these hormones promote their transfer across the membranes), thyrc C; Superfamily: serum albumin; serum albumin repeat homology
C; Keywords: carrier protein; duplication; plasma

A;Contents: annotation
A;Note: only a list of differences from sequence A36238 is shown
C;Comment: Serum albumin is synthesized in the liver as preproalbumin. It binds copper, r
mones (weak bonds with these hormones promote their transfer across the membranes), thyrc
